

ICT

QEH Juniors has an ICT suite housing twenty two computers.

All areas of our curriculum are frequently enhanced by such readily available access to ICT, as the boys use the ICT suite for some of their curriculum lessons as well as for the weekly ICT class. For example, a Year 5 Geography session may use Excel spreadsheets to record weather data for a particular region, then plot that data on a graph.

ICT lessons ranging from Scratch programming and touch typing to Powerpoint presentations help to ensure that our boys are highly proficient in the use of ICT by the time they move into the Senior School.
